

Supplier Extranet

The **Biznettraveltech Supplier Extranet** is an inventory, rate and reservation management solution which enables suppliers, partners, and vendors to easily manage their products and to create additional revenue streams.

The **Supplier Extranet** delivers strong yet easy-to-use functionality and its modular architecture is fully adaptable to your travel businesses evolving needs. **Supplier Extranet** has been developed to integrate seamlessly with the **travellTnow "Enterprise" Reservation System** and other third party reservation solutions such as **Tourplan**.

Fully OTA compliant, the **Supplier Extranet** has been developed using MS.NET, SQL Server 2005 and XML.
