

## Integrated GDS Travel Hub

Everyday, around the world, millions of buyers and sellers are exchanging their Travel products and services via a wide range of online sales channels. biznettraveltech can provide a platform to integrate these services within your Travel Business, giving your website access to 100,000's hotel rooms, holidays, transfers, flights, etc. **biznettraveltech** can provide the setup and technical support to allow your Travel Business to easily begin accessing these products, and making them a part of your online sales strategy.

**biznettraveltech** can provide a simplified travel distribution platform that will integrate perfectly within your existing or new online travel website. We provide a GDS hub which integrates with:

**Amadeus, Galileo, Sabre, GTA, Kuoni, Mehki, Hotelbeds, Multicom and Tourplan.**

Your online business may integrate with all of the above or one of the above-mentioned systems.

*“ Our ultimate objective is to provide your business with an end-to-end online travel solution at a competitive price which gives you a quantifiable return on your investment ”*

Stephen Leatham, Head of Sales - biznettraveltech

## XML Web Services Platform

We offer an OTA (OpenTravel™ Alliance) compliant XML web services Gateway that enables seamless integration with multiple CRSs, GDSs and other Travel Suppliers. It has a built-in Aggregation Engine and Business Rules Engine to show aggregated results from multiple suppliers. It acts as a Travel Distribution Platform or a Data Exchange Middleware Server and can connect to multiple systems. It is fully scalable and easily configurable architecture based on XML and SOA (Service Oriented Architecture).

### Key Features

- » Scalable Services Oriented Architecture
- » Built-in Business Rules Engine & Aggregation Engine
- » Compatibility with Industry standard XML specifications (OTA)
- » Aggregates responses from multiple suppliers
- » Secured access layer to multiple systems, components and data sources
- » Connects to diverse platforms and data sources

## The Benefits

### Multi-Bundle

**biznettraveltech's** XML web services platform offers Travel Websites the ability to Bundle XML requests to multiple suppliers within a single request. It also aggregates and consumes XML or any form of online data from suppliers.

### Wider Reach

For Suppliers, the XML Middleware Platform enables them to expose their compliant web services in a cost effective and secure manner giving them a wider reach. The core benefits are freedom from closed out inventories, more control on live inventory, real time pricing, multiple channels of distribution, and utilisation within existing Reservation Systems.

### Integration within your current web Sales Channels

The XML Platform can be configured to integrate directly with a clients existing Website or can be bundled as part of the **travellTnow** Product Suite.
